

NComping Log in Procedure

NComputing is either a 6 seat or 11 seat system. Each system will have only 1 HOST. The other systems will be numbered as station2 through station6 or station11.

When logging into the Ncomputing System
You will notice this statement at the top center of the monitor.

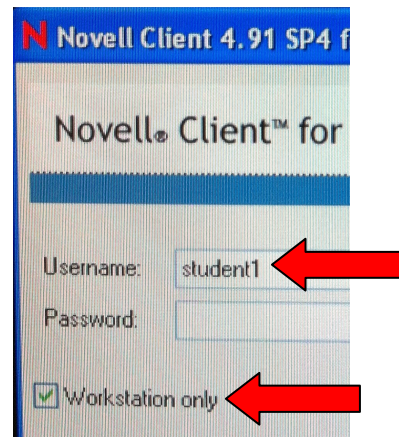

There will only be 1 HOST for each 6seat or 11seats .

****Only the Host system will have a username of *student1***

Password field will be left blank.

Make sure that you have checked the box mark
Workstation only

Click "OK"

When logging into the Ncomputing System
You will notice this statement at the top center of the monitor.

NComputing vSpace [Station 2]

The number that proceeds the word "station"
will be the number that is used to log into the
system.

For example:

*Station 2, username would be **student 2***

*If its Station5, username would be **student5***

Password field will be left blank.

Make sure that you have checked the box mark
